Software Development Process and Quality Assurance Methods

Here we are describing two things: -

 **Software Development Process of PTSL**

The following steps are followed by PTSL to develop any software:

Development Process and Quality Assurance are highly important to development of any software. Users expect a system where they work spontaneously and properly. Software development process and quality assurance method both are related thing. Without a proper development process, any software cannot be qualified.

PTSL ensure the users about their software development process and quality both are world standard.

Quality Assurance Methods of PTSL

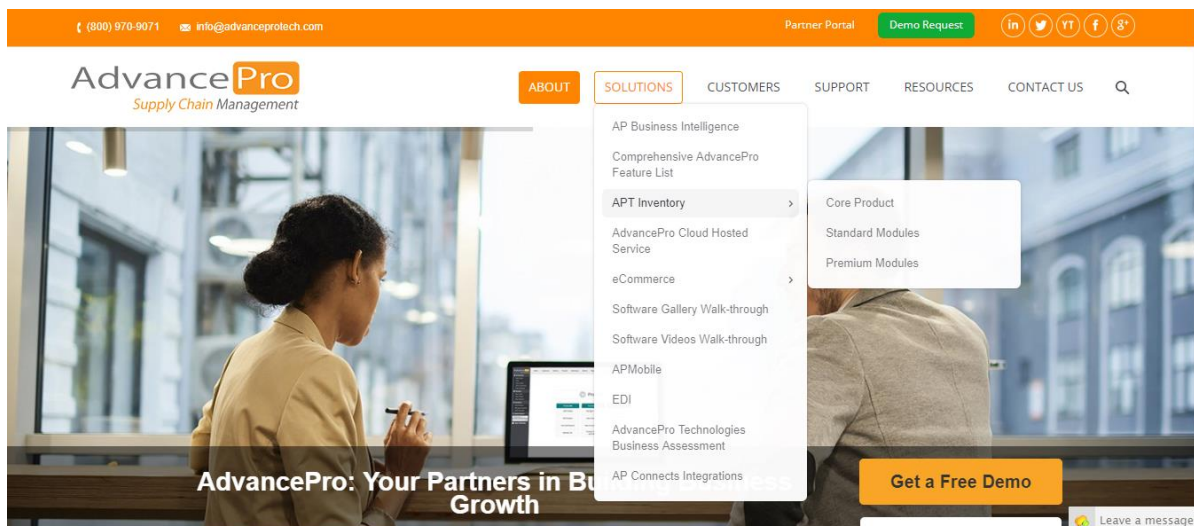

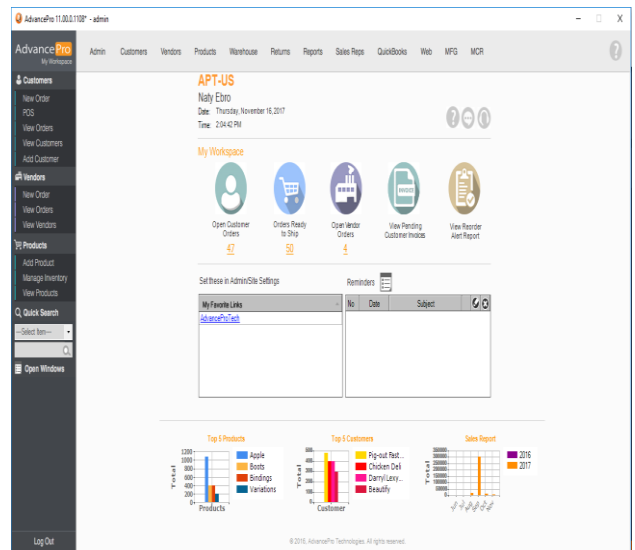

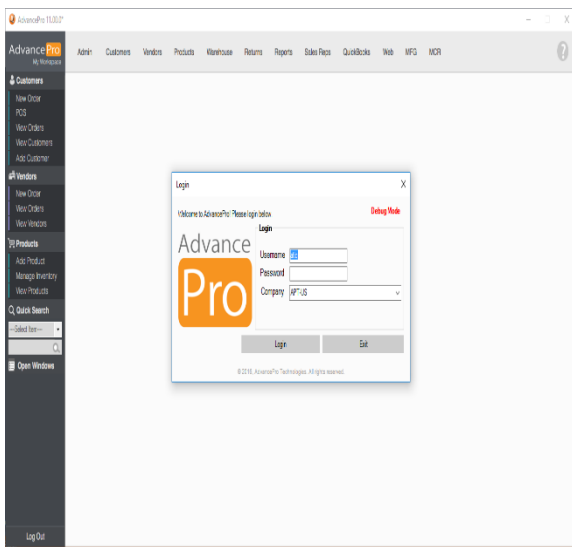

Some of Our Projects (Foreign):

Client: Advance Pro

Project: ERP for Advance Pro (Offshore Development)

AdvancePro became a critical technology for us in the 3PL (logistics) business, which I had founded. We started using APT because it was important for us to find a cost effective solution that would help us manage the inventory we were administering on behalf of our customers, and to provide our clients with real time information about their inventory. Our goal was to find a system that would reduce redundant activities by providing a one-point-of-entry portal solution, where each stakeholder – from the opening of an event, for example, creating a vendor order, to the end of the event, would have an opportunity to call up a relevant record and add the information that they owned. We also wanted our clients to be in touch with their inventory in real time, and have the most up to date information on the change of status of any event. We are working on their different modules.

<https://advanceprotech.com/>

Client: Great Adventure Tours Inc.

Project: Adventure Tours & Event Management System

In 1993, Great Adventure Tours Inc. began to offer tours in and around the great Lakes. Due to an increased demand and a high level of customer satisfaction services expanded to include a full range of group tour itinerary planning and high end individual travel services around the world.

In 2003 GATI Event Management was created, offering a full range of corporate meeting and incentive travel, to full destination travel services, site selection, contracting and full meeting planning services.

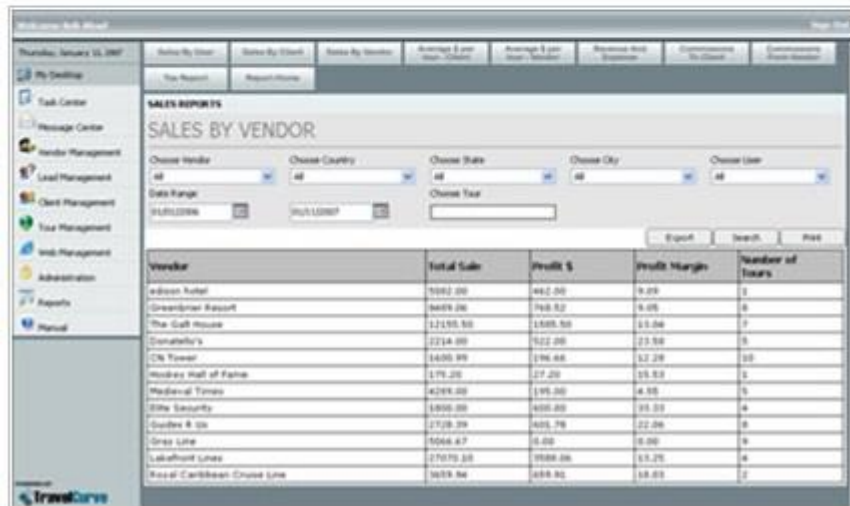

<http://www.greatadventuretours.com/>

Client: TC Tours

Project: travelcurve.com

TCI has listened to all the “I WISH MY SYSTEM COULD DO...” and has created the most powerful tour operator system on the market. Operators wanted a system that saves hours on planning and building a tour, a system that was web based and could be accessed from anywhere in the world, to have the ability to track costs and revenue and the means to create itineraries in minutes. With TC Tours, spend your time generating revenue for your company.

<http://www.travelcurve.com/TC%20Tours/TC%20Tours%20Offline/index.html>

Client: SELLOFFVACATIONS.COM

Project: TRAVEL FX CARD

SelloffVacations.com Travel FX Card is a prepaid MasterCard that carries a balance loaded on the card by the user. This card can be used at millions of locations worldwide, including online, over the phone, and at ATMs - wherever MasterCard is accepted.

 - Lost Property
 - Customer Inquiries
 - Customer Review
 - Customer Complaints
- Fare Schedule
- Download
- Privacy policy
- Contact

Client: WA Cabs Pty. Ltd.

Project: DJ directory & booking portal

Book Your DJ is Australia's premiere DJ directory and booking portal. We have built up a database of hundreds of DJs from all around Australia, and are continually getting more signing up each day! Each DJ has their own profile with a description, gallery, pricing table, message wall and so much more! Upon registration, DJs will also get access to their own personalized DJ calendar which they will use to set their availability to do events. Book Your Dj allows you, the consumer, to search for different DJs which are available to service your suburb, and are free at the particular time of your event. Upon finding the right DJ for your event, we allow you to make a booking request to the DJ online. This will shoot of an email to the specific DJ allowing him to accept/reject the booking. If accepted, you will be asked to pay a secure 35% deposit online through Pay Pal! We have designed and developed the site.

Client: Pacific luxury air

Project: Web Site development

Some Major App (Foreign)

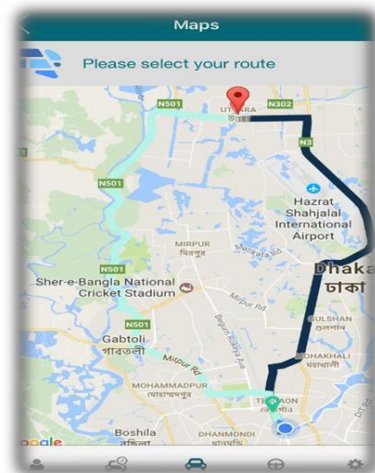

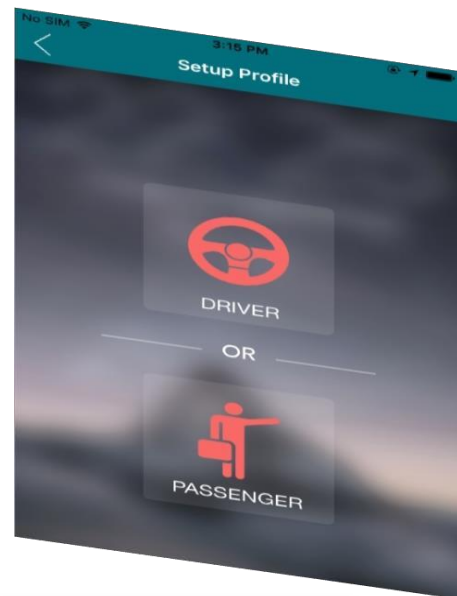

Client: RydeUp

Project: Ride Sharing Mobile App

RydeUp is a ridesharing app for fast, reliable rides in minutes—day or night. There’s no need to park or wait for a taxi or bus. With RydeUp, students just tap to request a ride, and it’s easy to pay with credit or cash in select cities. Requesting your RydeUp is easy— here’s how it works:

- Just open the app and tell us where you’re going.
- The app uses your location so your driver knows where to pick you up.
- You’ll see your driver’s picture, vehicle details, and can track their arrival on the map.
- Payment can be made by credit card, cash in select cities, Apple Pay, PayPal, and more.

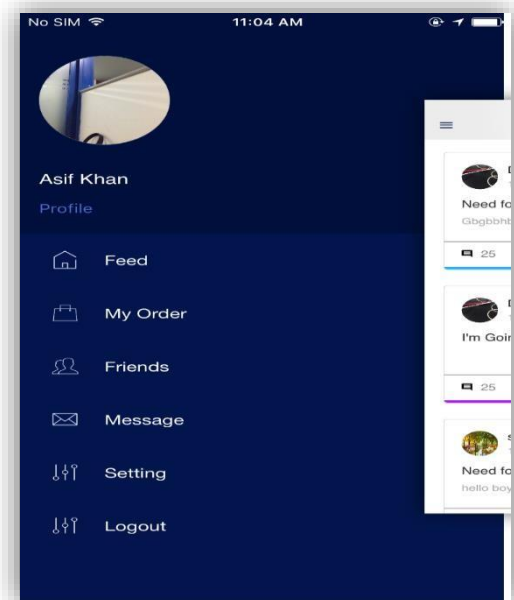

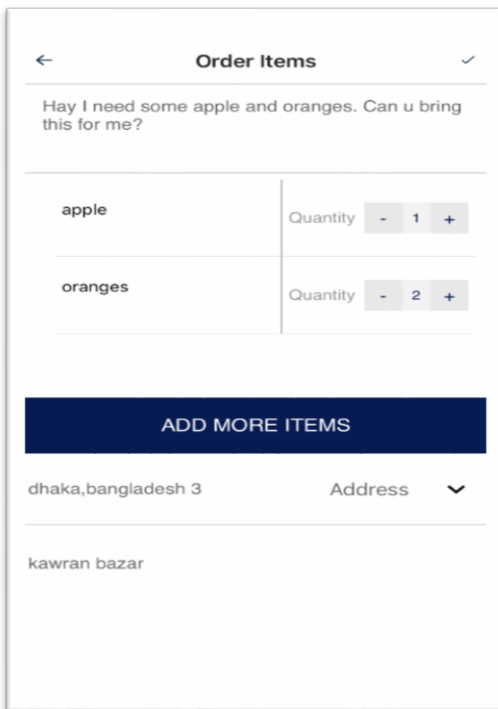

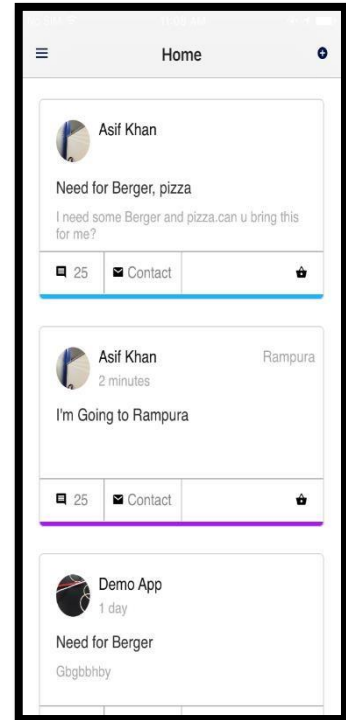

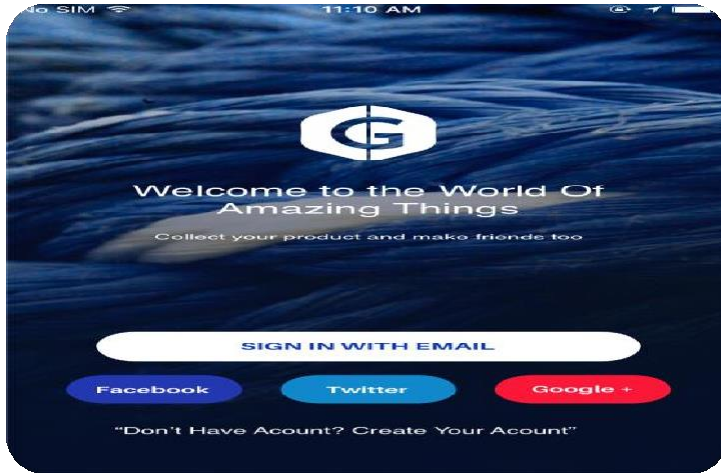

After the ride, you can rate your driver and provide feedback to help us improve the Uber experience. You’ll also get a receipt by email.

Client: Get Me Something Too

Project: Get Me Something Too Mobile App

Get Me Something Too is an iOS app. Through this app people can post where they are going for shopping and buying regular commodities, and take orders from other people. Once both the party agrees with terms and reference the one can buy the stuffs that other user ordered through the app and deliver it at their home to and collect the cash they spent for those goods.

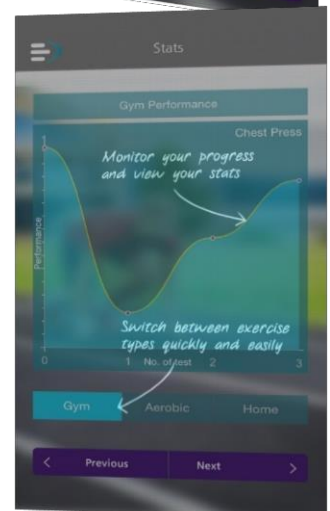

Client: Mitrainer

Project: Mitrainer Mobile App

Migraine is the ground-breaking exercise app that will give you weights and loads that are specific to you to help you to achieve your goal quickly. Use trainer to lose weight, get bigger or just improve your overall health, mitrainer will do it all and you control it all. Easily navigate around mitrainer's beautiful interfaces to find what you want, when you want it!

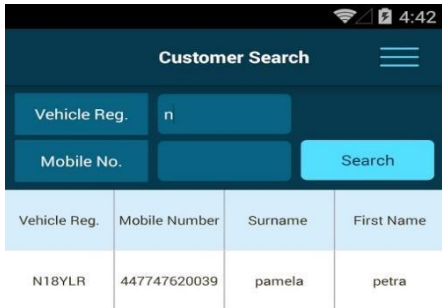

Main features:

- Proceeds go towards improving grassroots and inclusive disabled sport provision.
- Download over 1000 pre made programs.
- Unlimited amount of downloadable sessions administered by you.
- Create your own plan to fit around our lifestyle.
- Follow easy to use instructions of exercises or use our detailed pictures.
- Test yourself with tests you can do around the house, outside or in the gym.
- The do your exercises where you have done the tests.
- Track your results and improvements month-to-month.
- Designed by sport science professionals and developed with elite soccer

Client: Obelisk Tours London & Britain

Project: Belisk Tours

Obelisk Tours take you on a wonderful journey along the River Thames - the spine of London - and towards some of the most famous and iconic landmarks of the Capital; through British cities, towns and villages to discover the people and events that changed the course of history. This free app acts like a bookshelf which you can fill with tours of your choice through in-app purchases. There are four free tours ready for you to download or stream direct to the device and experience the full functionality of the tour experience. Over the coming months and years, we will be adding numerous tours around Britain covering a wide range of themes including Literary, Maritime, Faith, Military, Industrial and much more.

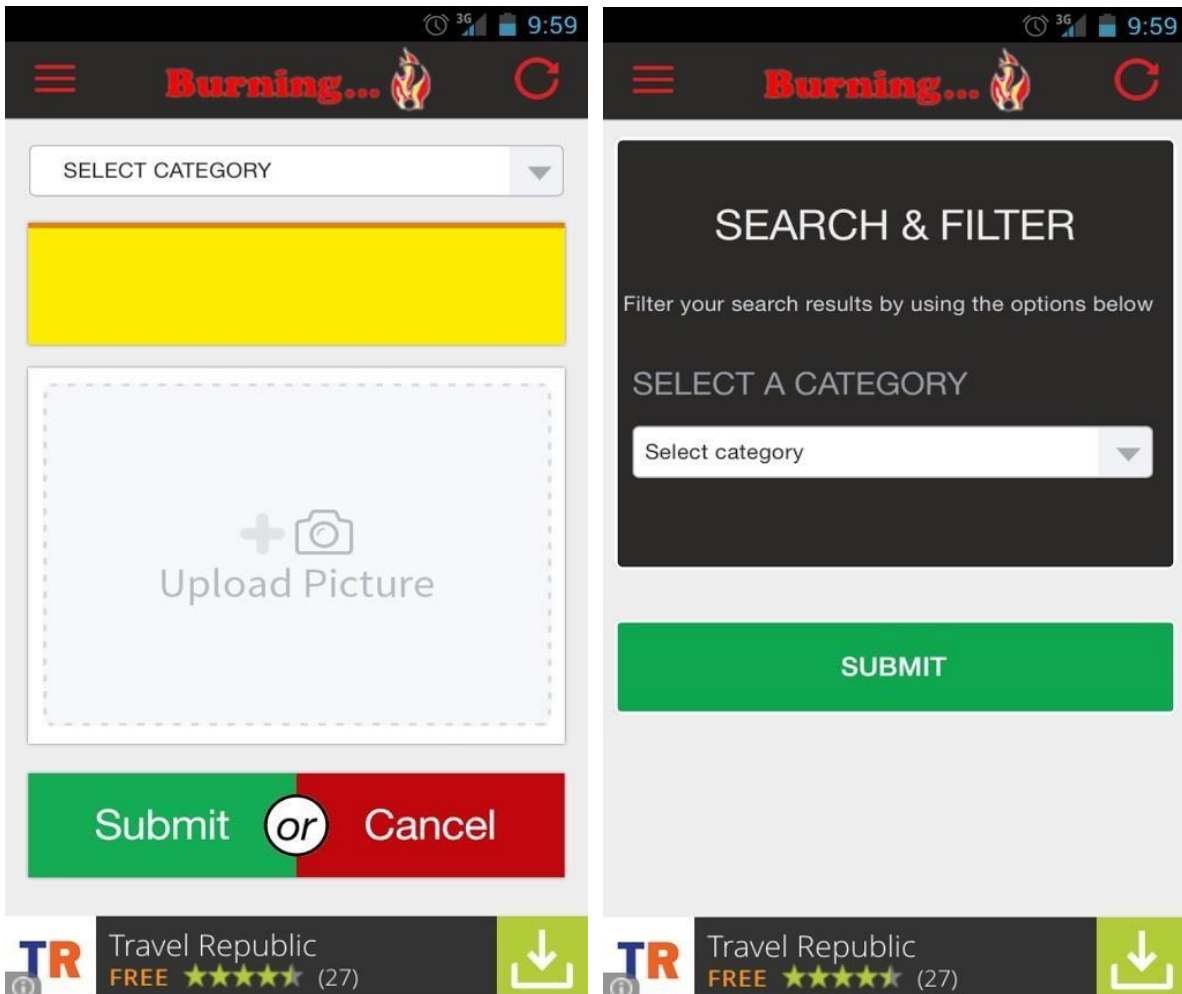

We delight in taking you to the famous sites plus we love to explore the hidden corners of our nation. Discover Britain at your fingertips:

- Routes and content created by professional tour guides and specialist experts.
- For use on the road or from the comfort of your own home
- Live Sat Nav included. Guides you from your front door to the tour anywhere in the world.
- GPS geo fencing automatically triggers audio as you enter the area.
- Option to stream or download tour content
- View online or offline
- Map, photos and/or engravings at each stop
- Text and audio description
- Click & share your images along the way
- Sync downloaded tours content with another device: phone for out on the road; tablet for home, perhaps.

Project: The Burning Question App

Registering with the polling app "The Burning Question" allows the user to pose any question that can be answered 'yes' or 'no', and to introduce an accompanying picture if desired. Basic categories include 'general' for users uncertain where their question fits. To answer a question, the user scrolls the categories to display a particular question and then swipes either 'yes' or 'no' displayed on the screen. The percentage results are then revealed, including how the votes are distributed according to gender, demography and country of origin. The question and result can be shared on social media. A 'random' facility results in a new question every time a question is answered.

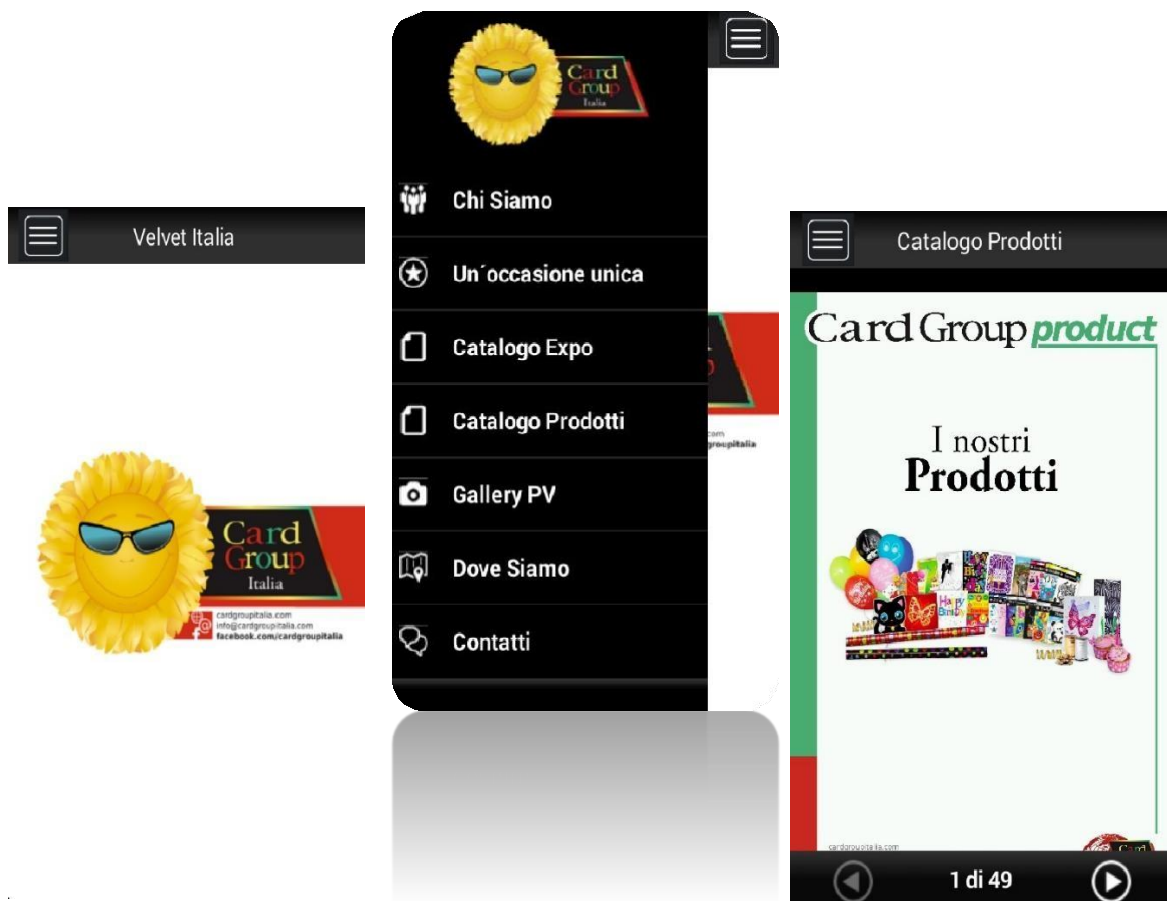

Client: Card Group Italia

Project: Card Group Mobile App

Card group is an international success distributor of greeting cards and gifts. Founded in Sweden in 1997, the company has reached immediately successful, rapidly expanding across Europa. IL Group continues to grow, expanding into new markets every year, to become the world leader in its sector.

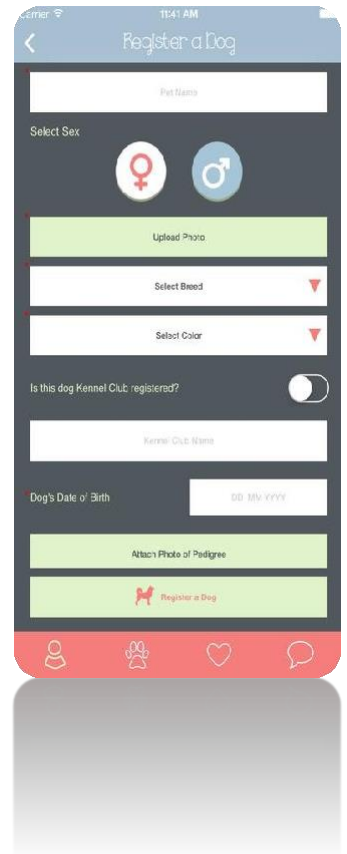

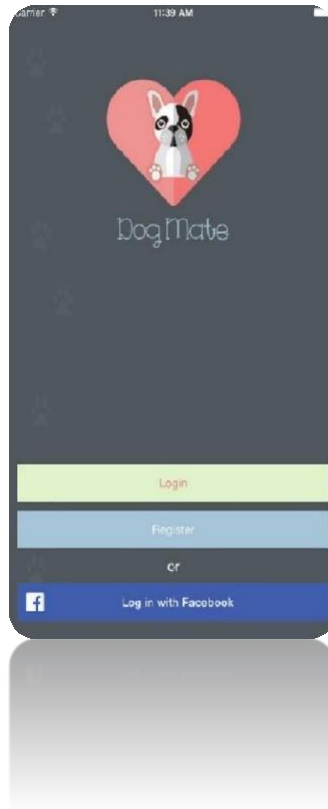

Card group produces and distributes in 44 countries around the world, combining the resources and support resulting from a large company, with the commitment and service of the local companies.

The Exclusive Distributor for Italy is the Velvet Italy Srl, based in Carpi (MO).

Project: DogMate App

The DogMate App is for dog lovers /owners/ breeders. It provides a communal meeting place to help dog owners find a breed they're interested in and how far or near to them a dog of that that breed can be found. If you have a male dog that you would like to stud or a female dog your looking to breed, then you can find them all in one place. If you are a dog lover just looking for a dog but don't know what breed, then you can search all breeds and find that special family pet here as well.

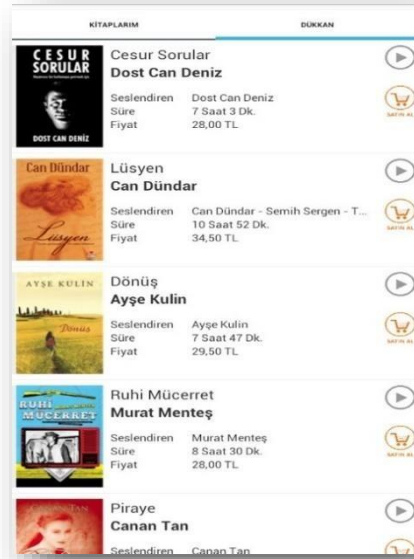

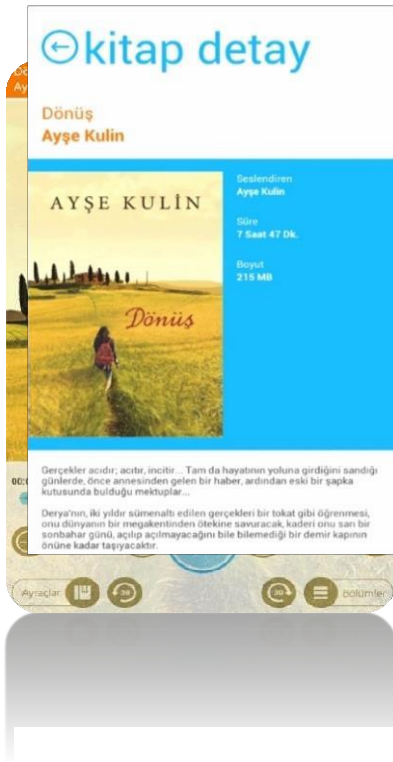

Client: Seslenen Kitap

Project: Kitap detay

With the Calling Book application, you can listen to the latest works of current writers and masterpieces of popular authors from the author's voice.

With this application, you can download books you bought on www.seslenenkitap.com to your mobile phone or to the tablet *, you can listen to your favorite places without internet connection. (* We recommend that you choose WiFi connection if you do not exceed the quota of your 3G subscription or pay an additional internet connection fee.)

Stop where you want your book while you are listening, then continue where you left off. You can skip the compartment you wish for your book, take the records back and forth, mark your desired place with bookmarks, or automatically stop your sleep timer and book at the desired time. All these features are now possible with the Shouting Book application.

Project: Puzzlechat Mobile App (ios)

The idea of Puzzlechat application is to communicate with other users through Puzzle exchange. By default, the main application window is Camera view, to make sure that user can take a picture every moment as fast as possible and create a Puzzle.

LOCAL PROJECT

Client: Local Government Engineering Department

Project: Improvement of the official website of LGED

Local Government Engineering Department (LGED) is one of the largest public-sector organizations in Bangladesh entrusted for planning and implementation of local level rural urban and small scale water resources infrastructure development programs. LGED works closely with the local stakeholders to ensure people’s participation and bottom–up planning in all stages of project implementation cycle.

We have developed and implemented their site.

Figure 1 Image of LGED Homepage

<http://www.lged.gov.bd/>

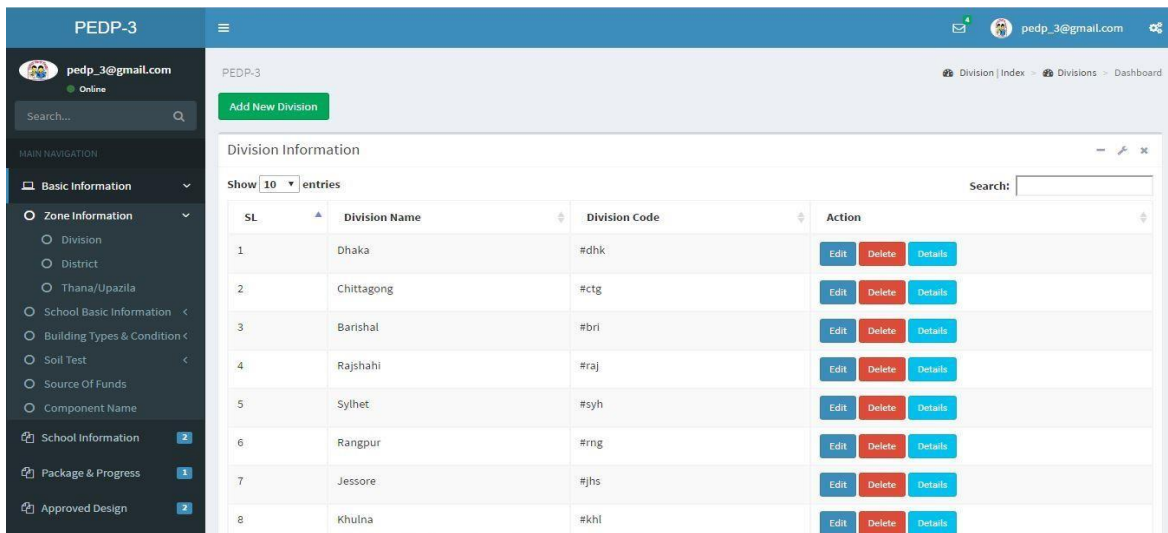

Client: Local Government Engineering Department

Project: Third Primary Education Development Program (PEDP-3)

Education is considered as one of the important ingredients for social and economic development of the country and help in reducing the poverty. Education plays a key role in government strategies aimed at poverty reduction, economic growth, social development and good governance. Over the past 20 years the number of institutions and proportion of enrolled students has grown at every level and Bangladesh's success in achieving gender parity in both primary and secondary education is acknowledged worldwide.

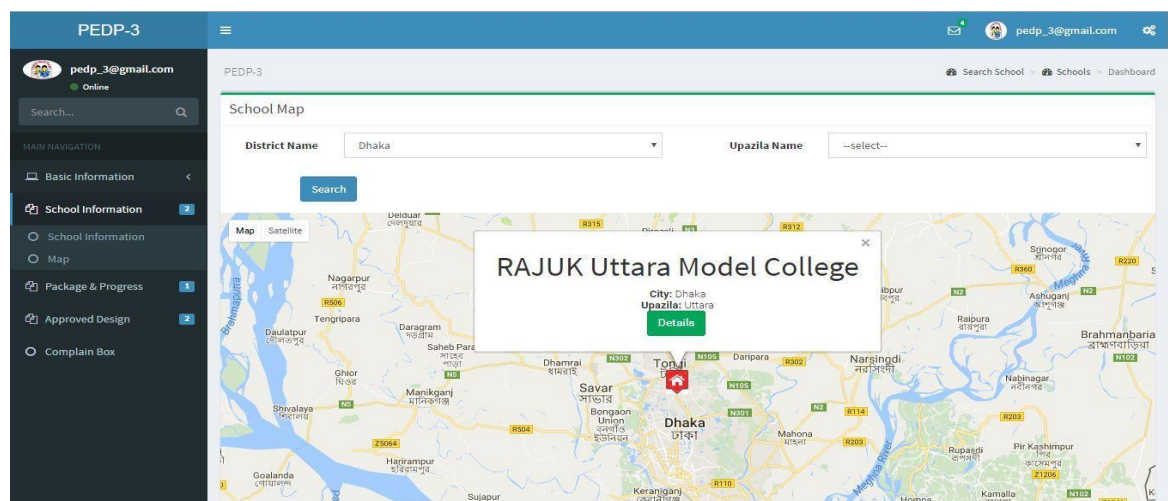

The Third Primary Education Development Program (PEDP-III) is a 5 years' sub-sector wide program (FY 2011-12 to FY 2015-16), focused on achievement of sub-sector wide results, covering all activities of primary education and MOPME. The total estimated cost of the program is Tk. 5835913.20 Lakh. Excluding the existing discrete projects, which are covered already under existing DPP's, the share of development and non-development financing for the program is 43% and 57% respectively. Total DP financing will be in the amount of U\$ 1085.50 million (Tk. 759850.00 Lakh) to the GOB.

We are working on the Monitoring Progress System for them.

The screenshot shows the 'Division Information' section of the PEDP-3 web application. It features a table with 8 entries, each representing a division. The table columns are SL, Division Name, Division Code, and Action. The Action column contains 'Edit', 'Delete', and 'Details' buttons for each entry.

SL	Division Name	Division Code	Action
1	Dhaka	#dhk	Edit Delete Details
2	Chittagong	#ctg	Edit Delete Details
3	Barishal	#bri	Edit Delete Details
4	Rajshahi	#raj	Edit Delete Details
5	Sylhet	#syh	Edit Delete Details
6	Rangpur	#rng	Edit Delete Details
7	Jessore	#jhs	Edit Delete Details
8	Khulna	#khl	Edit Delete Details

The screenshot shows the 'School Map' section of the PEDP-3 web application. It includes a search bar, a dropdown for 'District Name' (set to Dhaka), and a dropdown for 'Upazila Name' (set to --select--). Below the search bar is a map showing the location of 'RAJUK Uttara Model College' in Dhaka, with a 'Details' button next to it.

Client: Bangladesh Overseas Employment & Services Ltd.

Project: Web Site for manpower

Over View: Bangladesh Overseas Employment and Services Limited (BOESL) is only the "State owned" Manpower exporting Company in Bangladesh. The Government of the People's Republic of Bangladesh established Bangladesh Overseas Employment and services Limited (BOESL) in 1984 to earn more foreign exchange by way of exporting skilled and unskilled manpower. Client: Apex Footwear Limited

Project: Warehouse Management

Apex is the local retail wing of Apex Footwear Limited, the leading manufacturer and exporter of leather footwear of Bangladesh. Established in 1997, with the vision of presenting the Bangladeshi consumers with the opportunity to experience quality leather footwear designed according to the latest market trends and technology from Europe. At the same time, its product range is tailored to deliver value for money for different price segments in the local market.

Apex currently has over 210 retail outlets throughout the country in addition to over 300 authorized retail sales distributors (RSDs) to ensure nationwide coverage of its footwear. Through Apex4u.com, the company aims to make their products available to the growing digital enthusiasts of the country, who prefer to save their transportation time, search and buy products online. Apex is committed to deliver the same level of service to its online customers that they have achieved through its retail channel.

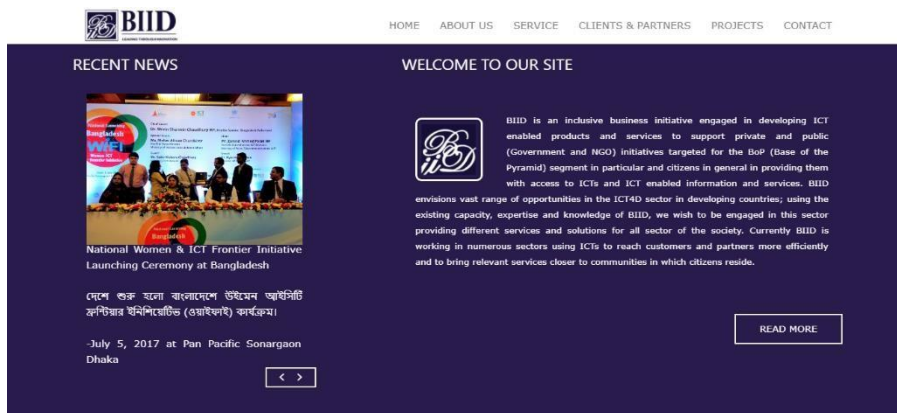

The success measure is to be able to establish a strong web presence, attract large number of users, effectively promote their products and provide excellent and economical support. We have design a developed their website.

Client: Bangladesh Institute of ICT in Development (BIID) Project: Web Site Development

BIID is an inclusive business initiative engaged in developing ICT enabled products and services to support private and public (Government and NGO) initiatives targeted for the BoP (Base of the Pyramid) segment and citizens in general in providing them with access to ICTs and ICT enabled information and services. BIID envisions vast range of opportunities in the ICT4D sector in developing countries; using the existing capacity, expertise and knowledge of BIID, we wish to be engaged in this sector providing different services and solutions for all sector of the society. Currently, BIIDs working in numerous sectors using ICTs to reach customers and partners more efficiently and to bring relevant services closer to communities in which citizens reside.

We have Developed their website

Client: Bank Alfalah

Project: Monitoring System for All Cash Deposit Machine

We have built the monitoring system for all the cash deposit machine for Bank Alfalah Limited. Through the system user can see the all reports, which Deposit machine is online, when the transaction is happening. We have also built the cash deposit system for the bank too. Through the system user can deposit cheque or cash through ATM booth machine.

The screenshots illustrate the following steps in the kiosk's user interface:

- Screen 1:** Main menu with the Bank Alfalah logo and the text "Deposit Payment Kiosk". Below the header, it says "Welcome to Bank Alfalah Ltd." and "ব্যাংক আলফালাহ লিমিটেডে আপনাকে স্বাগতম". There are two buttons for language selection: "বাংলা" (Bangla) and "English".
- Screen 2:** Shows the "Account Deposit" option with "Cancel" and "Home" buttons. Below are "Cheque Deposit" and "Cash Deposit" buttons.
- Screen 3:** The "Cheque Deposit" screen displays an image of a cheque. Below the image is a text input field for the "12 digit account number" and "Back" and "Next" navigation buttons. A numeric keypad with buttons for digits 1-9, 0, and a decimal point is also visible.
- Screen 4:** Shows the "Cheque Deposit" screen with the instruction "Place your Cheque in the deposit window" and an image of a hand placing a cheque into a slot.
- Screen 5:** Shows the "Cash Deposit" screen with the instruction "The deposit window is now open. Please drop the envelope with in 20 seconds" and an image of a hand dropping an envelope into a slot.
- Screen 6:** A final screen with a red footer bar.

Client: Banglalink Digital Communications Limited (Banglalink)

Project: Dispatch Management System (DMS)

Banglalink dispatch team of the Administration unit handles more than 4500 documents & 5500kgs of parcel weekly. The team uses a legacy system to track the incoming and outgoing dispatches. But the system has some drawbacks. And some additional features are desired. In this document the whole system features are explained with a goal to create new system.

Our Dispatch Management System module enables you to manage your Dispatch effectively and easily.

Client: Banglalink Digital Communications Limited (Banglalink)

Project: Banglalink E-Shop

An e-shop is an online business that sells a variety of goods and services. Banglalink E-shop is just like a retail store but instead of having a physical location, its location is on the internet. The purpose of the E-shop that customers can buy anytime they want without going to retail store. They can buy devices with different packages and SIM cards through this online E –Shop. And Providing Superior customer service is the main goal of this E- shop. We have developed the backend of the Banglalink E-shop. We are also working on Banglalink POS management System.

Client: Local Government Engineering Department

Project: IRIDIP, LGED

The project has been prepared in line with the strategy of the rural infrastructure improvement. Provision has been made under this project is to improve the important rural roads, structures on upazila, union and village road (bridge/culvert), rural market, boat landing ghat. Proposed development works will improve rural access within the project area and also to the markets and thus facilitate agriculture production, generate employment and help directly to alleviate poverty of the rural poor. As such the project has been formulated in conformity with the objective of NSAPPR-2 and to meet the rural development priority of the elected government, and also consider huge public demand for rural infrastructure development. Consequently, the concerned honorable member of the parliament has submitted the scheme list on priority basis.

Client : Gulshan Society

Project: Car App

Following the Holy Artisan Bakery terrorist attack, Gulshan Society has been working closely with DMP and the Dhaka (North) City Corporation to ensure security and ease traffic jam in the area. To this end, at the request of DMP (North), Gulshan Society is pleased to introduce car sticker, whereby the residents and corporate offices having permanent and temporary address in Gulshan, can enter the area easily through a separate lane and enjoy other benefits. This privilege is only for the residents and corporate offices situated in Gulshan. We have made the application for Car Sticker little detailed to ensure that the car ticker does not go to the wrong hands. Should the members/residents find the form below difficult to fill up, please call the society office for assistance. We hope all concerned will find this initiative useful.

Gulshan Society Car Sticker Mobile application has been made to complement the web based car sticker application. Through this android app DPM (North) can verify the vehicles by scanning the BAR code which is given with individual sticker.

By scanning the BAR code police authority can get the detail accurate information regarding that specific vehicle so that it does not go to the wrong hands.

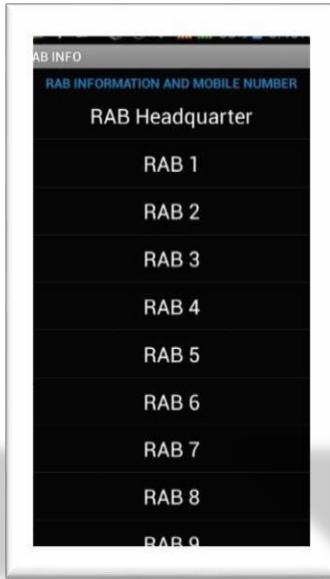

The screenshot shows a mobile application interface for Gulshan Society. At the top, there is a logo for Gulshan Society featuring a house and a tree. Below the logo is a blue button labeled "CAR STICKER APPLICATION". A large text box contains the following text: "Following the Holy Artisan Bakery terrorist attack, Gulshan Society has been working closely with DMP and the Dhaka (North) City Corporation to ensure security and ease traffic jam in the area. To this end, at the request of DMP (North), Gulshan Society is pleased to introduce car sticker, whereby the residents and corporate offices having permanent and temporary address in Gulshan, can enter the area easily through a separate lane and enjoy other benefits. This privilege is only for the residents and corporate offices situated in Gulshan. We have made the application for Car Sticker little detailed to ensure that the car ticker does not go to the wrong hands. Should the members/residents find the form below difficult to fill up, please call the society office for assistance. We hope all concerned will find this initiative useful." Below this text box are two buttons: "Policy & Instructions" and "IF YOU FIND IT DIFFICULT TO FILL UP THE FORM BELOW, Please contact Gulshan Society office for assistance @ +8802 9881375, +8801715 882117". At the bottom, there is a form with two tabs: "Gulshan Residents" and "Companies in Gulshan". The "Gulshan Residents" tab is selected, and the form contains a section titled "RESIDENTS INFO" with a question: "Are you Gulshan Society Member?*" followed by radio buttons for "Yes" and "No".
